

MOHAMMED OMER SHAIK

AI PRODUCT LEAD AND SOLUTIONS ARCHITECT

Toronto, Ontario • +1 647 982 9633 • mohammed@omershaik.com • omershaik.com • [LinkedIn](https://www.linkedin.com/in/mohammedomershaik/) • [GitHub](https://github.com/mohammedomershaik)

PROFESSIONAL PROFILE

AI product lead and solutions architect with experience across banking systems, content moderation tools, manufacturing process improvement, and hands on AI product delivery. Leads work from an unclear operating problem through requirements, architecture, implementation, testing, and release. Portfolio includes a bilingual procurement product, a production autonomous intelligence agent, an agentic research platform, AI evaluation tooling, generative visual workflows, and real estate decision systems.

CORE EXPERTISE

Product and delivery: Product discovery, product strategy, roadmaps, PRDs, workflow mapping, use case scoping, user journeys, user stories, backlog prioritization, acceptance criteria, user acceptance testing, launch planning, stakeholder management, Agile, Scrum

AI systems: LLM applications, autonomous agents, reasoning workflows, retrieval augmented generation, embeddings, semantic search, vector retrieval, tool calling, structured outputs, prompt engineering, context engineering, evaluation sets, source grounding, guardrails, human review

Engineering and data: Python, TypeScript, JavaScript, Java, React, Next.js, Node.js, FastAPI, REST APIs, PostgreSQL, SQL, Redis, Supabase, Weaviate, Docker, Git

Automation and integration: Workflow automation, API integrations, data pipelines, document processing, background jobs, scheduled jobs, approval workflows, reporting

Quality, security and reliability: pytest, Vitest, Playwright, unit testing, integration testing, end to end testing, schema validation, authentication, authorization, audit logging, retries, fallbacks, rate limiting, monitoring, CI/CD

PROFESSIONAL EXPERIENCE

AI Product Lead and Solutions Architect, CodeSpellStudio

Sep 2024 to Jul 2026

Canada and India (Remote)

- Led AI product and software delivery across client engagements, partner backed products, studio developed products, open source work, and internal operating systems in Canada and India. Owned discovery, requirements, architecture, implementation, testing, release controls, demonstrations, and documentation.
- Built SANAD as an external product build for a founder preparing a commercial launch. The bilingual procurement product covers contractor discovery, comparable bids, messaging, milestones, approvals, purchase orders, invoices, and audit records across 126 screens, 452 registered states, and 904 English and Arabic browser cases.
- Built and operated LaserEyedBen as a partner backed production product using about 16 live sources and more than 20 intelligence engines. Internal benchmarks recorded an 85 percent cache hit rate below 100 milliseconds and full intelligence responses below 1.5 seconds.
- Developed Lorenth as a CodeSpellStudio research product that plans questions, ingests files and links, gathers current evidence, streams progress, produces cited findings, and exports reports. Owned the workflow, APIs, retrieval, structured output, quality checks, and failure behavior.
- Developed Crucible and PlotLight as studio product initiatives, and released Palate as an open source Model Context Protocol design server. Each includes typed contracts, validation, automated tests, and clear points for human judgment.
- Used direct real estate operating work at CodeSpellStudio to shape PropertyLedger, a 47 point legal and title review system, and PARCEL, a property data product with provenance and visible missing data.

Product Owner, Content Moderation Tools, Majorel Canada

Oct 2023 to Aug 2024

Canada

- Worked across content moderation and advertising review workflows, applying policy, privacy, quality, and escalation rules to day to day decisions and tooling feedback.
- Recorded workflow findings, analyzed recurring quality issues, and turned reviewer problems into clear requirements and recommendations for tool and process improvement.
- Converted policy changes, reviewer feedback, and escalation patterns into workflow requirements and acceptance criteria, then worked with operations and technical teams to prioritize corrective work.
- Coordinated with operations, quality, engineering, and linguistics to clarify defects, policy interpretation, and expected workflow behavior.

Quality Assurance and Process Improvement Analyst, Co-op, Elite Mobility Mfg.

May 2023 to Aug 2023

Mississauga, Ontario

- Gathered, cleaned, and analyzed manufacturing and quality data to identify patterns affecting product quality, support statistical process control, and track key performance indicators.
- Supported development and validation of machine learning models used to identify potential quality issues and guide root cause investigation.
- Streamlined the inspection sequence and allocation of quality work, reducing quality check time by 25 percent within two months while supporting root cause analysis and corrective actions with production, engineering, and design teams.

PROFESSIONAL EXPERIENCE CONTINUED

Software Architect and Technical Product Lead , Bismi Services Pvt. Ltd. <i>Hyderabad, India. Banking systems engagements for HSBC Bank and Saudi National Bank</i> - Translated banking operations and data requirements into service boundaries, API contracts, relational schemas, integration logic, reporting workflows, and release acceptance criteria. - Designed maintainable Java and Python services and SQL workflows, documenting data mappings, dependencies, controls, failure handling, and implementation decisions. - Worked with business, engineering, and QA teams through Agile and Scrum to refine the backlog, resolve delivery risks, and guide work from design through production support. - Produced technical specifications and architecture notes that gave engineering and QA teams a shared source for interfaces, validation rules, dependencies, and acceptance criteria. - Investigated release and production issues across services, databases, and integrations, then converted findings into corrective work and clearer release decisions. - Automated recurring reports, data movement, and QA checks to reduce manual processing and identify discrepancies earlier.	May 2018 to Jun 2022
---	-----------------------------

Ad Operations Specialist, Campaign Delivery and Quality , Yahoo <i>India</i> - Supported digital campaign setup, delivery monitoring, data quality, reporting, and issue resolution in a high volume advertising environment. - Coordinated corrections across targeting, creative, tracking, and reporting data so campaign records remained aligned with delivery requirements. - Checked campaign inputs and workflow records for completeness and accuracy before delivery.	Sep 2017 to May 2018
---	-----------------------------

Founder, Product Manager and Operations Lead , Instazop <i>Kalaburagi, India</i> - Created the product concept, website, wireframes, business model, launch plan, vendor relationships, ordering flow, delivery process, local marketing, and customer service model for an early online grocery marketplace. - Managed day to day operations and supervised eight delivery personnel. The service handled an average of 20 customers per day in its first month. - Used customer conversations and order patterns to adjust assortment, promotions, vendor coordination, and delivery communication. - Reached approximately 60 percent returning customers in the following month by improving order communication, fulfillment, and local promotions.	Apr 2015 to Aug 2017
--	-----------------------------

EDUCATION

Ontario Graduate Certificate, Artificial Intelligence and Machine Learning <i>Lambton College, Toronto, Ontario</i> Machine learning, natural language processing, deep learning, data mining, big data processing, model evaluation, and data visualization.	Jan 2022 to Aug 2023
Bachelor of Engineering, Computer Science and Engineering <i>P.D.A. College of Engineering, Kalaburagi, India</i>	Completed Jul 2017

CERTIFICATIONS

Professional Scrum Product Owner I (PSPO I) , Scrum.org	
AI in Fintech Essential Training , LinkedIn Learning	2023

TOOLS AND PLATFORMS

OpenAI, Anthropic Claude, Perplexity, Hugging Face, Claude Code, OpenAI Codex, Cursor, Gemini, Model Context Protocol, Pydantic, SQLAlchemy, Prisma, GitHub Actions, Linux, and cloud deployment workflows.
